To Doctors for Mozambique
Members
Collaborators

Hi everyone!

At this moment, no text is enough to express my gratitude for the immeasurable help, love, acceptance, accompaniment, understanding, empathy, sympathy, correction, criticism, praise, reinforcement, punishment, responsibility, trust, respect and everything that Doctors for Mozambique provided to me in this long and difficult journey that today comes to the end.

Frankly, I don't know what would become of me without you and your help! I remember when I was in 11th grade at Barada Secondary School when I had the information about the existence of this foundation that provides scholarships to the best students. I was moved because I began to think that I had an opportunity in sight, which depended on my good progression, and it gave me force to continue being focused on my objectives.

I remember also that weekend in Nazaré in the casting process, the anxiety, tears and despair were very pronounced, than the happiness until the last day when I was chosen to study medicine. My first day of class at the UCM Faculty of Health Sciences made me feel Doctor and this emotion gave me the force to continue studying seriously.

My student's journey was marked by difficulties at various levels, but with God and the help of this great family I managed to overcome it and, finally, I became the person that I want to be since my childhood: **"A Doctor with enough skills to save lives"**.

It is with great satisfaction that I am immensely grateful to Doctors for Mozambique and its collaborators, saying that: **"Your son is now a Doctor"**.

Finally, my special thanks go to Dra Gitta, Dr Harry and Dr Mauane for always being close to us and following our progression in detail. May god bless DFM, its members and collaborators. Thank you so much.
